

## Rabbit Anti-Human IgG F(ab')<sub>2</sub> Secondary Antibody-HRP

### Product Details

Ig Type:	IgG
Reactivity:	Human
Purification:	Protein A purified

### Applications

Application:	ELISA,IHC-F,IHC-P,WB
Recommended	WB: 1:1000-10000; IHC-P: 1:100-500; IHC-F: 1:100-1000; ELISA: 1:1000-10000

### Properties

Stability & Storage:	Store at -20°C or -80°C for 12 months. Avoid repeated freeze-thaw cycles.
Shipping:	Shipping with blue ice.

### Antigen Details

Immunogen:	Human IgG F(ab') <sub>2</sub> fragment
Synonyms:	Rabbit Anti-Human IgG F(ab') <sub>2</sub> (HRP)

### Research Background

Human IgG consists of four subclasses (1-4) that can be recognised by antigen differences in their heavy chains. Each subclass has different biological and physiochemical properties. The IgG subclass may be preferentially produced in response to different antigens. The Fab fragment (fragment antigen binding) is the antigen region of the IgG molecule. It is composed of one constant and one variable domain of each of the heavy and the light chain.
