

Urobilinogens

Chemical Properties

CAS No. : 11000-27-4

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Urobilinogens comprise a mixture of bilirubin metabolites, including D-urobilinogen, L-urobilinogen (stercobilinogen), and i-urobilinogen (mesobilirubinogen). These compounds are produced from bilirubin by gut microbiota. In mice on a high-fat diet, the cecal concentrations of D-urobilinogen, L-urobilinogen, and i-urobilinogen are increased. Furthermore, elevated fecal levels of L-urobilinogen are inversely associated with reduced blood hemoglobin levels in patients with heterozygous β -thalassemia.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
