

## Cyclosporin A-BSA

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	Cyclosporin A-BSA is a hapten-carrier protein conjugate formed by coupling Cyclosporin A to bovine serum albumin (BSA). As a hapten, Cyclosporin A alone cannot induce an immune response and must be conjugated to a large molecular protein to become a complete antigen with immunogenicity. Cyclosporin A-BSA may be supplied as a lyophilized powder or as a solution. The solution is prepared in 0.01M PBS (pH 7.4) buffer at a typical concentration of 1mg/mL.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
