

Chicken Tenascin

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Chicken Tenascin is a glycoprotein composed of a hexameric structure connected by disulfide bonds. Suitable for cell culture, it consists of repeating domains, including epidermal growth factor-like repeats, fibronectin type III repeats, and fibrinogen-homologous regions. Chicken tenascin is applicable for use in cell culture.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
