

Cellulose Assay Kit (Microanalysis)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder -20°C for 3 years
In solvent -80°C for 2 years

Actual storage temperature shall be subject to the COA.

Biological Description

Description

Cellulose is a macromolecular polysaccharide composed of glucose. It is usually bound with hemicellulose, pectin, and lignin, serving as the main structural component of plant cell walls. As an important dietary fiber, cellulose is the most widely distributed and abundant polysaccharide in nature.
