

CSF3R/G-CSFR Protein, Human, Recombinant (His) V2

General Information

Synonyms:	colony stimulating factor 3 receptor (granulocyte);CD114;CSF3R;GCSFR;G-CSF R
Protein Construction:	Glu25-His627
Species:	Human
Expression Host:	HEK293 Cells
Accession:	Q99062-1
Molecular Weight:	68.29 kDa (Predicted); 90-110 kDa (Due to glycosylation)

QC Testing

Biological Activity:	Immobilized Human G-CSF R, His Tag at 1 µg/ml (100 µl/well) on the plate. Dose response curve for Human G-CSF, hFc Tag with the EC50 of 6.0 ng/ml determined by ELISA.
Purity:	> 95% as determined by Tris-Bis PAGE; > 95% as determined by HPLC
Endotoxin:	< 1.0 EU/µg of the protein as determined by the LAL method.
Formulation:	Lyophilized from 0.22 µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.

Preparation and Storage

Reconstitution:

Reconstitute the lyophilized protein in sterile deionized water. The product concentration should not be less than 100 µg/mL. Before opening, centrifuge the tube to collect powder at the bottom. After adding the reconstitution buffer, avoid vortexing or pipetting for mixing.

Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

The Granulocyte Colony-Stimulating Factor (G-CSF) receptor, a member of the hematopoietin cytokine receptor superfamily, functions as a homodimer and requires the recruitment of cytosolic protein tyrosine kinases (PTKs) to transduce its signal.
