

GIP (1-30)-Myr

Chemical Properties

CAS No. :

Formula: C176H265N39O49S

Molecular Weight:

Keep away from moisture

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	GIP (1-30)-Myr, a modified form of GIP (1-30) with Myr, is a fragment of glucose-dependent insulinotropic polypeptide (GIP). This hormone, classified as an incretin, enhances insulin secretion and reduces postprandial blood glucose fluctuations. GIP (1-30) stimulates insulin secretion in a dose-dependent manner, effective within the 10^{-9} to 10^{-6} M range.
Targets(IC50)	IGF-1R

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
