

AF 594 carboxylic acid

Chemical Properties

CAS No. :

Formula: C47H64N4O11S2

Molecular Weight:

Keep away from direct sunlight

Storage:

Store at -20°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description	AF 594 carboxylic acid is the carboxyl derivative of the red fluorescent dye AF 594, characterized by a high fluorescence quantum yield and excellent photostability (with a maximum excitation wavelength of 594 nm and a maximum emission wavelength of 615 nm). It can react with amino-containing molecules through its carboxylic acid group to form stable covalent bonds.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
