

## activable cell-penetrating peptide (ACCP)

### Chemical Properties

CAS No. :

Formula: C63H100N22O28S

Molecular Weight:

Keep away from moisture

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

### Biological Description

Description	Activable cell-penetrating peptide (ACCP) consists of a polycationic CPP, typically arg9 or r9, linked to a matching polyanion, usually glu9 or e9, via a cleavable linker. This connection reduces the net charge to nearly zero, thereby inhibiting adhesion and uptake into cells.
Targets(IC50)	Others

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
