

Tat-peptide control 168-189

Chemical Properties

CAS No. :

Formula: C162H239N47O65S

Molecular Weight:

Keep away from moisture

Storage:

Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Tat-peptide 168-189 is a cell-permeable Tat-tagged fusion peptide corresponding to residues 168-189 of rat G3BP1. The Tat sequence from HIV is incorporated at the least conserved end of this sequence to enhance cellular permeability. Serving as a negative control for Tat-peptide 190-208, Tat-peptide 168-189 contrasts with Tat-peptide 190-208, which promotes axon growth and increases the number of neurites per neuron.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
