

2Abz-SLGRKIQIK(Dnp)-NH2

Chemical Properties

CAS No. :

Formula: C59H95N19O16

Molecular Weight:

Keep away from moisture

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	2Abz-SLGRKIQIK(Dnp)-NH2 is a bioactive peptide. [This peptide serves as a physiological substrate for the second complement component (C2), which is the zymogen of the first complement component, C1s. The complement system is a central element of host defense but can also result in inflammation under pathological conditions. The C1s protease of the C1 complex initiates the host defense pathway. This peptide utilizes a 2Abz/Dnp FRET pair to quantify complement enzyme activity.]
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
