

SHR-2042

## Chemical Properties

CAS No. :

Formula: C205H314N48O63

Molecular Weight:

Keep away from moisture

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	SHR-2042 is a selective agonist of the GLP-1 receptor. By activating the GLP-1 receptor, it enhances insulin secretion and suppresses glucagon secretion, thereby improving blood sugar regulation. When combined with sodium N-(8-[2-hydroxybenzoyl] amino) caprylate (SNAC), it forms micelles that promote monomerization, increasing oral absorption efficiency.
Targets(IC50)	Glucagon Receptor

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
