

Radretumab

Chemical Properties

CAS No. : 1253180-81-2

Formula:

Molecular Weight:

Storage: Store at low temperature
Store at -20°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Radretumab (also known as L19SIP) is a fully human monoclonal antibody in a small immunoprotein (SIP) format that specifically targets the extra-domain B (ED-B) of fibronectin. ED-B is a crucial marker of angiogenesis, highly expressed in the extracellular matrix of neovasculature within various solid tumors but nearly absent in normal adult tissues. Radretumab is typically labeled with radioisotopes such as ¹³¹ I to deliver ionizing radiation directly to tumor sites through high-affinity binding to tumor vessels. In clinical trials, it is investigated for treating solid tumors and associated brain metastases.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
