Biological Description

Description	Anti-ANO1/TMEM16A Antibody is a potent tool antibody targeting the calcium-activated chloride channel ANO1, utilized for investigating functional interactions between ion channels and receptor tyrosine kinases (RTKs). The compound specifically recognizes the ANO1 protein, revealing how its physical complex with the epidermal growth factor receptor (EGFR) synergistically regulates downstream signaling cascades, aiming to modulate tumor cell proliferation and survival potential by intervening in this interaction.
Targets(IC50)	Chloride channel

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
