Biological Description

Description	GLP-1R/GIPR agonist-1 is a dual receptor agonist for GLP-1 (glucagon-like peptide-1) and GIP (glucose-dependent insulintropic polypeptide). It mimics the action of endogenous hormones GLP-1 and GIP, enhancing insulin secretion while suppressing glucagon release, thus lowering blood sugar. This compound is used in research related to metabolic disorders such as diabetes, obesity, and non-alcoholic steatohepatitis (NASH).
