

Maackia amurensis Lectin (MAA/MAL II)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Maackia amurensis Lectin (MAA/MAL II) is a plant lectin known for its specific carbohydrate recognition capabilities. It binds to molecules with particular sugar structures, exhibiting a high affinity for α -2,3-linked sialic acid, making it a precise probe for biomolecular binding. Maackia amurensis Lectin (MAA/MAL II) is utilized in the discovery of disease-related biomarkers and the investigation of cancer pathologies.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
