

Cross-linked sodium hyaluronate gel

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Cross-linked sodium hyaluronate gel is a biomaterial formed through the cross-linking reaction of sodium hyaluronate. It possesses excellent moisturizing properties, viscoelasticity, and biocompatibility, making it suitable for arthritis treatment as well as for developing auxiliary materials in ophthalmic surgeries.
