

Human Factor XIIIa Beta

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Human Factor XIIIa Beta is an active fragment of coagulation factor XIII, playing a crucial role in the intrinsic coagulation pathway and leading to clot formation. Additionally, Human Factor XIIIa Beta is involved in the kallikrein-kinin system, resulting in the release of bradykinin (a vasodilator). Bradykinin stimulates the release of catecholamines and mediates its cardiovascular effects through a non-cholinergic, angiotensin-converting enzyme (ACE) regulatory mechanism.
Targets(IC50)	RAAS

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
