

MPSD TFA

Chemical Properties

CAS No. :

Formula: C147H243N41O31.xC2HF3O2

Molecular Weight:

Keep away from moisture

Storage:

Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	MPSDTFA (MARCKS-ED TFA) is the TFA salt form of MPSD. This compound is a peptide consisting of 25 amino acid residues derived from the effector domain sequence of the endoplasmic reticulum protein myristoylated alanine-rich C-kinase substrate (MARCKS). MPSD TFA is capable of sensing membrane curvature and recognizing phosphatidylserine. It serves as a biological probe for studying membrane morphology and lipid composition.
Targets(IC50)	PKC

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
