

Anti-Patched Polyclonal Antibody 3

Product Details

Ig Type:	IgG
Reactivity:	Mouse,Rat (predicted:Human,Pig)
Molecular Weight:	Theoretical: 161 kDa. Actual: 161 kDa.
Purification:	Protein A purified

Applications

Sample:	Lane 1: Cerebrum (Mouse) Lysate at 40 µg Lane 2: Cerebrum (Rat) Lysate at 40 µg
Verified Activity:	Primary: Anti-Patched (TMAB-10005) at 1/1000 dilution Secondary: IRDye800CW Goat Anti-Rabbit IgG at 1/20000 dilution Predicted band size: 161 kD Observed band size: 161 kD
Application:	WB
Recommended	WB: 1:500-2000

Properties

Stability & Storage:	Store at 2°C-8°C for 1 month. Store at -20°C or -80°C for 12 months. Avoid repeated freeze-thaw cycles.
Shipping:	Shipping with blue ice.

Antigen Details

Immunogen:	KLH conjugated synthetic peptide: human Patched
Antigen Species:	Human
Gene ID:	5727
Uniprot ID:	Q13635

Research Background

PTCH (Patched protein homolog 1) is a receptor for sonic hedgehog (SHH), indian hedgehog (IHH) and desert hedgehog (DHH). PTCH associates with the smoothed protein (SMO) to transduce the hedgehog's proteins signal. PTCH has a tumor suppressor function, as inactivation of this protein is probably a necessary, if not sufficient step for tumorigenesis. PTCH is expressed in the adult brain, lung, liver, heart, placenta, skeletal muscle, pancreas and kidney. It is also expressed in tumor cells but not in normal skin. During development PTCH is found in all major target tissues of sonic hedgehog, such as the ventral neural tube, somites, and tissues surrounding the zone of polarizing activity of the limb bud.

Defects in PTCH are probably the cause of basal cell nevus syndrome also known as Gorlin syndrome or Gorlin-Goltz syndrome.
