

Atigotatug (FUT8-KO)

Chemical Properties

CAS No. : 2733581-82-1

Formula:

Molecular Weight:

Store at low temperature

Storage: Store at -20°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Atigotatug (FUT8-KO) is a monoclonal antibody expressed in CHO cells, where the fucosyltransferase 8 gene (FUT8) has been knocked out. The absence of fucose enhances the antibody's ADCC effect. It targets the fucosylated ganglioside GM1 (fuc-GM1) and is an IgG1κ type humanized antibody. Atigotatug can induce immune-mediated tumor cell death, such as in small-cell lung cancer.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
