

## 1,3,5-Triiodo-2-methoxybenzene

## Chemical Properties

|                   |                                                                                                                     |
|-------------------|---------------------------------------------------------------------------------------------------------------------|
| CAS No. :         | 63238-41-5                                                                                                          |
| Formula:          | C <sub>7</sub> H <sub>5</sub> I <sub>3</sub> O                                                                      |
| Molecular Weight: | 485.83                                                                                                              |
| Storage:          | Powder: -20°C for 3 years   In solvent: -80°C for 1 year<br>Actual storage temperature shall be subject to the COA. |

## Biological Description

|               |                                                                                                                        |
|---------------|------------------------------------------------------------------------------------------------------------------------|
| Description   | 1,3,5-Triiodo-2-methoxybenzene is a pharmaceutical intermediate employed in the synthesis of various active compounds. |
| Targets(IC50) | Others                                                                                                                 |

## Preparing Stock Solutions

|       | 1mg       | 5mg        | 10mg       |
|-------|-----------|------------|------------|
| 1 mM  | 2.0583 mL | 10.2917 mL | 20.5833 mL |
| 5 mM  | 0.4117 mL | 2.0583 mL  | 4.1167 mL  |
| 10 mM | 0.2058 mL | 1.0292 mL  | 2.0583 mL  |
| 50 mM | 0.0412 mL | 0.2058 mL  | 0.4117 mL  |

Please select the appropriate solvent to prepare the stock solution, according to the solubility of the product in different solvents. Please use it as soon as possible.

Note: The dilution table applies only to solid products. For liquid products, please calculate the stock solution based on the stated concentration and/or density.
