

BTI-322

Chemical Properties

CAS No. : 339181-10-1

Formula:

Molecular Weight:

Storage: Store at low temperature
Store at -20°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description	BTI-322 is a rat monoclonal IgG2b targeting the CD2 antigen on T cells and NK cells. It effectively blocks primary and memory alloantigen proliferative responses in vitro and identifies over 90% of E-rosette-forming peripheral blood lymphocytes and T-cell leukemia. BTI-322 has immunosuppressive activity and suppresses T-cell responses to allogeneic cells in vitro, serving as a T-cell depleting agent. It is used in research on kidney transplant rejection and steroid-resistant acute graft-versus-host disease.
Targets(IC50)	Immunology/Inflammation related

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
