

Endo SH

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Endo SH is a fusion protein of Endo S (derived from Streptococcus pyogenes) and Endo H (derived from Streptomyces plicatus), expressed in Escherichia coli. It cleaves the core structure of high-mannose, complex, and certain hybrid N-glycans in N-glycoproteins, effectively removing N-linked high-mannose glycans, and serves as a complete substitute for Endo S and Endo H.
