

FMOC-NH-PEG-SH (MW 2000)

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	FMOC-NH-PEG-SH (MW 2000) [also known as FMOC-NH-PEG-Thiol (MW 2000)] is a PEG derivative featuring an Fmoc protective group and a thiol (-SH) reactive group. The thiol group is highly reactive, allowing it to form stable covalent bonds through specific reactions with various molecules. Fmoc serves as a common amino-protective group, shielding the amino group from undesired reactions until its removal is necessary for targeted coupling reactions.
