Biological Description

Description	FMOC-NH-PEG-SH (MW 10000) [FMOC-NH-PEG-Thiol (MW 10000)] is a PEG derivative featuring an Fmoc protective group and a thiol (-SH) reactive group. The thiol group is highly reactive, capable of specific interactions with various molecules to form stable covalent bonds. Fmoc serves as a common amino protective group that shields the amino group from unwanted reactions until a specific coupling reaction is desired.
