

FA-PEG-COOH (MW 600)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	FA-PEG-COOH (MW 600) (Folate-PEG-COOH (MW 600)) is a polyethylene glycol (PEG) derivative modified with folic acid, featuring a carboxyl group (-COOH). The carboxyl group can readily form stable amide bonds with amino groups and ester bonds with hydroxyl groups. Folic acid (-FA) has high affinity for folate receptors, making it useful for targeted drug delivery to cell membrane receptors.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
