

β -galactosidase mRNA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	β -galactosidase mRNA (N1-Methylpseudo-UTP) encodes the bacterial lactose Z gene product, β -galactosidase. This enzyme catalyzes the conversion of β -galactosides into monosaccharides and serves as a universal marker for assessing transfection efficiency. The inclusion of N1-Methylpseudo-UTP reduces the immunogenicity of the generated mRNA.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
