

Neutrophil Gelatinase Associated Lipocalin (NGAL), Human

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Neutrophil Gelatinase Associated Lipocalin (NGAL), Human (EC 6.1.1.3), is part of the lipid transport protein family and is primarily secreted by activated neutrophils. It binds to MMP-9, enhancing its activity and preventing its degradation. NGAL is mainly recognized as a biomarker for acute kidney injury and is released following renal tubular damage and during kidney regeneration.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
