

## DNA Recombinase

### Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

### Biological Description

Description	DNA Recombinase is an efficient multifragment recombinase mixture that facilitates the assembly of one or more DNA fragments into any linearized vector to form a complete plasmid. It operates by recognizing the homologous arms (17bp-50bp) at the ends of DNA inserts and linearized vectors, without regard to fragment length or end compatibility.
Targets(IC50)	DNA/RNA Synthesis

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
