

ATP sulfase, yeast

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	ATP sulfase, yeast is a type of ATP sulfate protease. It catalyzes the activation of sulfate by transferring the sulfate group to the adenosine monophosphate moiety of ATP, resulting in the formation of adenosine-5'-phosphosulfate (APS) and pyrophosphate (PPi).
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
