

ATP-13C dilithium

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	ATP-13C dilithium is the 13C-labeled form of ATP. ATP (Adenosine 5'-triphosphate) is a crucial compound for energy storage and metabolism within the body, providing energy for metabolic processes and acting as a coenzyme in cells. It also plays a significant role as an endogenous signaling molecule in immune response and inflammation.
Targets(IC50)	Endogenous Metabolite

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
