

PEG4000

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	PEG4000 can be utilized as a pharmaceutical excipient, such as in ointment bases and lubricants. Pharmaceutical excipients, also known as auxiliary agents, are chemical substances used in the manufacturing of pharmaceuticals that are not the active drug components. They generally refer to inactive ingredients in drug formulations that enhance stability, solubility, and processability. Furthermore, excipients can affect the absorption, distribution, metabolism, and elimination (ADME) of co-administered drugs.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
