

## ANKK1 Protein, Human, Recombinant (GST)

### General Information

Protein Construction:	Recombinant full length human ANKK1 (SGK288) was expressed by baculovirus in Sf9 insect cells using an N-terminal GST tag.
Species:	Human
Expression Host:	Baculovirus-Insect Cells
Accession:	Q8NFD2
Molecular Weight:	~115 kDa

### QC Testing

Representative specific activity data for ANKK1 were obtained using different assay formats:

Biological Activity:	- 7.2 nmol/min/mg, determined by radioactive kinase assay
	- 1 nmol/min/mg, determined by ADP-Glo kinase assay, corresponding to 7 nmol/min/mg in the radioactive kinase assay

Different lots may be tested using different assay methods; therefore, values obtained using different assay formats are not directly comparable.

Purity: >75% as determined by SDS-PAGE.

Formulation: Supplied as sterile 50 mM Tris-HCl, pH 7.5, 150 mM NaCl, 10 mM glutathione, 0.1 mM EDTA, 0.25 mM DTT, 0.1 mM PMSF, 25% glycerol.

### Preparation and Storage

#### Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months.

Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

#### Shipping:

Enzymes are highly recommended to be shipped at frozen temperature with dry ice. Shipment made at ambient temperature may seriously affect the activity of the ordered products.
