

## Bovine CB11 of type II collagen

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	Bovine CB11 of type II collagen (Bovine cyanogen bromide digested peptide 11) is a peptide fragment derived from cyanogen bromide digestion of type II collagen (CB-peptide). It is utilized in the study of B cell and T cell epitopes specific to type II collagen. This compound does not contain pepsin, making it ideal for investigating T cell epitope specificity via proliferation assays. Additionally, Bovine CB11 can serve as an antigen for assessing antibody epitope specificity through ELISA analysis.
Targets(IC50)	Others

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
