

Bovine CB9.7 of type II collagen

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Bovine CB9.7 of type II collagen (Bovine cyanogen bromide digested peptide 9.7) is a peptide fragment resulting from the cyanogen bromide digestion of type II collagen, used for the investigation of B and T cell epitopes related to type II collagen. This product is free from pepsin, making it ideal for analyzing T cell epitope specificity via proliferation assays. Additionally, Bovine CB9.7 can serve as an antigen in ELISA to assess antibody epitope specificity.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
