

Human CB8 of type II collagen

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

| | |
|---------------|--|
| Description | Human CB8 of type II collagen, also known as Human cyanogen bromide digested peptide 8, is a peptide fragment derived from cyanogen bromide digestion of type II collagen. It is utilized for studying B cell and T cell epitopes of type II collagen. This product is devoid of pepsin, making it ideal for examining T cell epitope specificity through proliferation assays. Additionally, Human CB8 of type II collagen serves as an antigen in ELISA to analyze antibody epitope specificity. |
