

Chick CB8 of type II collagen

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Chick CB8 of type II collagen (Chick cyanogen bromide digested peptide 8) is a fragment of type II collagen's cyanogen bromide digested peptide (CB-peptide) that serves in the study of B cell and T cell epitopes of type II collagen. Free of pepsin, this compound is ideal for investigating T cell epitope specificity through proliferation assays. Additionally, Chick CB8 of type II collagen can function as an antigen for analyzing antibody epitope specificity via ELISA.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
