

Bovine CB8 of type II collagen

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Bovine CB8 of type II collagen (Bovine cyanogen bromide digested peptide 8) is a peptide fragment from the cyanogen bromide digestion of type II collagen (CB-peptide) and is utilized for studying B cell and T cell epitopes of type II collagen. This product is pepsin-free, making it ideal for examining T cell epitope specificity through proliferation assays. Additionally, Bovine CB8 of type II collagen serves as an antigen for analyzing antibody epitope specificity via ELISA.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
