

Rabbit Hemoglobin

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description

RabbitHemoglobin is a hemoglobin derived from rabbits. Hemoglobin is an iron-containing protein in red blood cells with oxygen-binding properties. It acts as an HO-1 inducer and consists of heme, which can bind with oxygen. Hemoglobin also transports gases such as carbon dioxide, nitric oxide, hydrogen sulfide, and sulfides. Additionally, it absorbs excess oxygen in tissues and serves as an antioxidant.
