

Human CB11 of type II collagen

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Human CB11 of type II collagen (Human cyanogen bromide digested peptide 11) is a fragment of collagen type II cyanogen bromide digested peptide (CB-peptide). It is utilized in studying B cell and T cell epitopes of type II collagen. This product lacks pepsin, making it ideal for assessing T cell epitope specificity through proliferation assays. Additionally, Human CB11 of type II collagen serves as an antigen in ELISA for analyzing antibody epitope specificity.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
