

## Human CB12 of type II collagen

### Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

### Biological Description

Description	Human CB12 of type II collagen (Human cyanogen bromide digested peptide 12) is a cyanogen bromide-digested peptide fragment of type II collagen, suitable for studying B cell and T cell epitopes of type II collagen. Free from pepsin, it is ideal for investigating T cell epitope specificity via proliferation assays. Additionally, Human CB12 of type II collagen serves as an antigen for evaluating antibody epitope specificity through ELISA analysis.
Targets(IC50)	Others

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
