

BCMA CAR mRNA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	BCMA CARmRNA encodes a CAR protein targeting human BCMA and induces temporary CAR expression in T cells without the necessity for permanent genetic modification. It is used in cancer research as it targets BCMA, a member of the tumor necrosis factor receptor superfamily 17 (TNFRSF17), also known as B-cell maturation antigen (CD269). This receptor supports B-cell survival and plays a role in regulating humoral immunity. Notably, BCMA is highly expressed in multiple myeloma and serves as a biomarker for its diagnosis.
