

Topoisomerase II, Yeast

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Topoisomerase II, Yeast (EC 5.99.1.3) is an essential enzyme involved in critical DNA processes such as replication, transcription, chromosome segregation, and recombination. All cells contain two primary types of topoisomerases: type I topoisomerase, which cleaves a single strand of DNA, and type II topoisomerase, which cuts and passes double-stranded DNA.
Targets(IC50)	Topoisomerase

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
