

Enterokinase, Porcine

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Enterokinase, Porcine (EC 3.4.21.9), is an enzyme produced by duodenal cells, playing a role in the digestive processes of humans and animals. It converts trypsinogen (a zymogen) into its active form, trypsin, thereby activating pancreatic digestive enzymes. A deficiency in enterokinase can lead to impaired intestinal digestion.
Targets(IC50)	Endogenous Metabolite

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
