

Protein Kinase C,Rat

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Protein Kinase C, Rat (EC 2.7.1.37) is a type of protein kinase that regulates the function of other proteins by phosphorylating the hydroxyl groups on serine and threonine residues. This kinase can be activated by signals such as increased concentrations of diacylglycerol (DAG) or calcium ions (Ca ²⁺).
Targets(IC50)	PKC

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
