

Malic Dehydrogenase, Thermus flavus

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description

Malic Dehydrogenase, Thermus flavus (EC 1.1.1.37), is present in eukaryotic cells as two isoenzymes: one expressed in mitochondria, where it functions in the tricarboxylic acid cycle, and the other found in the cytoplasm, where it converts malate from the mitochondria back into oxaloacetate.
