

## Nonadecanoic acid-d3

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	Nonadecanoic acid-d3 is the deuterium-labeled variant of nonadecanoic acid. Nonadecanoic acid is a saturated fatty acid with 19 carbon atoms and is the primary component of secretions from the termite <i>Rhinotermes marginalis</i> . It can be isolated from various sources, including fungi, plants, and sponges. This compound inhibits fibrinolysis and plasmin activity. Additionally, nonadecanoic acid produced by <i>Streptomyces</i> exhibits antitumor properties and inhibits the production of IL-12.
Targets(IC50)	Endogenous Metabolite,Thrombin

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
