

Laccase, Rhus vernicifera

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description

Laccase, Trametes versicolor (EC 1.10.3.2), is a blue copper oxidase that reduces molecular oxygen to water. It can oxidize polyphenols, methoxy-substituted phenolic compounds, and diamines but does not oxidize tyrosine. The oxidation reactions of Laccase are single-electron processes, resulting in the formation of free radicals.
