

Streptokinase, Streptococcus hemolyticus

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Streptokinase, an enzyme from Streptococcus hemolyticus (EC 3.4.99.0), is secreted by various streptococci. It binds to and activates human plasminogen. The complex formed between streptokinase and human plasminogen can activate additional unbound plasminogen by cleaving specific bonds, resulting in the production of plasmin.
Targets(IC50)	Endogenous Metabolite

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
